Standardized Repair Costs

D & A Truck and Trailer Repair offers standardized billing for your company. Our services can be tailored or changed to accommodate any one of our customers needs. In addition we also set each of our customers up on a fixed cost billing system. This insures the same charges for the same work in conjunction with our automated inspection services allows the customers to have a more consistent billing structure and help control maintenance expenses for your fleet and equipment. We can tailor an agreeable amount of service/work performed and standardize the cost of basic maintenance to your fleet, improving projections, budgets and cost analysis.

Custom Invoicing Options

D & A Truck and Trailer Repair has **Custom Invoicing options** available to suit your needs for the billing of service/maintenance performed. We have the ability to customize customer's specific invoices providing specialized information on your invoices including but not limited to, Purchase order numbers, unit numbers, mileage, services dates, itemized parts and labor charges, and many more.

Special Request Customer Instructions

In addition to our custom invoicing D & A Truck and Trailer Repair can also specify **special request customer instructions**. Having the ability to set reminders and system halts as needed. For example each time a order is created a memo can be displayed stating the instructions for that customer in this case a customer requires authorization of any repairs performed over the amount of \$500.00 the customer is to be contacted before proceeding any further along with specific instruction of who to contact and where, etc.

Fleet Tracking & Reporting

D & A Truck and Trailer has the ability to track various types of inspections due, work performed and other types of notifications on your fleet equipment. Our state of the art software system provides reminders of the specific days each inspection is due and the last time it was performed including the work that was completed. This information can also be reported in a multitude of different formats via E-Mail, Fax, Phone, Weekly, Monthly or Quarterly it can be tailored to suit your needs. By tracking and reporting this information we maximize the efficiency of your fleet equipment.
